

Simple Steps

1. start Compute Engine (hadoop-docker)
2. SSH -> Open in browser window
⇒ **@hadoop-docker**
3. Check Image -> **sudo docker images**
⇒ Image Name
4. Check Running image -> **sudo docker ps**
⇒ Container ID
5. Run image -> **sudo docker run -hostname=<<image name>> ..**
⇒ **@quickstart**

or

attach image -> **sudo docker exec -it <<CONTAINER ID>>**
⇒ **@quickstart**

>>> WORK <<<
6. Exit(kill) -> **exit** / Exit(unkill) -> **Ctrl-P + Ctrl-Q**
7. Commit -> **sudo docker commit <<CONTAINER ID>>**
